

Best Practice – Mark Donkin and his team at Stapleford STW have been using the SafeSmart Access Portable Truck Access Adjustable Aluminium Stairs. They have praised the simplicity of the product and its effectiveness at providing safe access/egress into a Bund.

SafeSmart Access Portable Truck Access Adjustable Aluminium Stairs (above)

CRL have been commended by the Client/PC for using this ingenious form of access to get safely in and out of the bund.

The stairs requiring no fixing as that sit on a ridged rubber pad to prevent any slippage.

They can be self-levelled to accommodate a height of between 0.9 & 1.4m

Available from CMT Group for next day delivery anywhere in the U.K for either hire or sale.

Also available is the normal stair version with sets ranging from 0.4 – 0.7m height all the way up to 2.7-4.1m. Sets can also be joined form longer runs.

Consider these as an alternative to “Making Do”.

Remember when it comes to health & safety we operate a NO COMPROMISE policy!!!

Cheers
Ben Hatfield

SPECIFICATION

PORTABLE TRUCK ACCESS ADJUSTABLE ALUMINIUM STAIRS

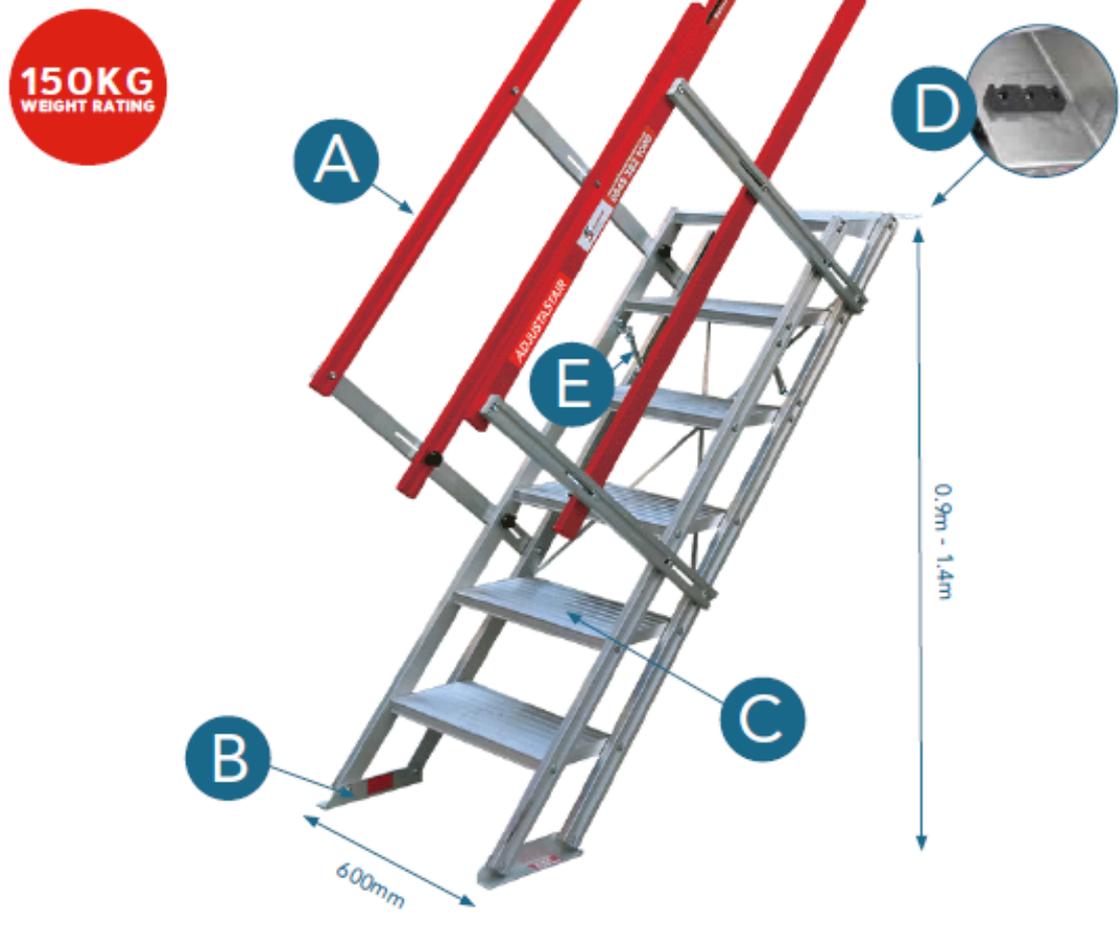

CODE	WIDTH	HEIGHT ADJUSTMENT	STEPS
210275	600mm	0.9 - 1.4m	6 Step
