New CRL Site Observation App

We have now launched a new app for capturing site data. This can be used by anyone to record almost anything; good or bad it doesn't matter just use the app to share what you see.

The form that the app takes you to is designed to take less than 2 minutes to complete so it won't take up your valuable time and it is very easy to capture pictures using your phone camera.

Remember that if you see something that is high risk and you didn't manage to fix it please note this on the form and this will escalate the priority of the item noted.

Please also ensure that you inform your line manager/supervisor of all high risk items.

A dashboard has been created on the intranet homepage under the "More" / "SHEQ Dashboards" tab where you will be able to review all entries. There is also a link on this dashboard that takes you to the app form.
